43-тя Міжнародна конференція ISCHE (The International Standing Conference for the History of Education)

«Історії освітніх технологій. Культурні та соціальні виміри педагогічних об'єктів» (Milan, Italy, 31.08.-06.09.2022)

GREETINGS FROM THE LOCAL ORGANISERS

Dear conference participants,
On behalf of the Local Organising Committee, I warmly welcome you to Milan for the 43rd ISCHE Conference "Histories of Educational Technologies. Cultural and Social Dimensions of Pedagogical Objects". The Conference is in association with both Italian societies for the history of education (CIRSE *Centro Italiano per la Ricerca storico-educativa* and SIPSE *Società Italiana del patrimonio storico-educativo*) and is sponsored by the Region of Lombardy and the Department of Education at the Catholic University.

The conference topic was chosen by the LOC years before the pandemic, to encourage scholars to reflect on the development and use of educational technologies, concentrating not only on the educational theories involved, but on the pedagogical means employed in all their aspects: symbolic, economic, political, and religious. Teaching practice is complex and involves objects and artifacts that can be examined from different points of view in terms of their conceptualization, design, industrial production, and actual use in the classroom. ISCHE 43 aims to encourage reflection on schools' material culture in all its dimensions: the pedagogical use of images and media; the tools and devices used in special education; the design, use and function of school furniture; the transnational circulation of pedagogical means and models; and the impact of the industrial production of school tools. The papers that were accepted by the Scientific Committee (only a tenth of the proposed abstracts were rejected) present a rich and wide range of topics that revolve around these questions. The LOC is confident that ISCHE 43 will produce important and relevant scientific results.

With nearly 400 participants expected to attend in person and more than 120 following the conference online, from 48 countries all over the world, with nearly 300 papers, 23 pre-convened panels, 7 symposia, 3 research workshops, 134 sessions, and 2 plenary addresses, the 43rd ISCHE Conference will serve as a powerful means of stimulating scientific debate and cultural exchange, continuing a long and fruitful tradition. After the halt imposed by the pandemic in 2020 and the 42nd ISCHE conference organised by Orebro University being held online in 2021, the LOC accepted the challenging task of organising a conference in person, in order to encourage a return to the productive scientific discussion that can be realised more fully through direct contact, thus promoting greater acquaintance between colleagues from different countries. Professional social contact is one of the positive effects of international conferences and is particularly useful for young researchers. Nonetheless, in recognition of the medical and economic difficulties and the uncertainty of these times, the LOC also agreed to organise a two-day online conference and to stream the keynotes and the General Assembly. It is the first time an ISCHE conference has been held both in person and online and we hope our efforts will meet the various needs of those participating. We warmly welcome you all and in particular our colleagues from Ukraine. We hope that those of you who come to Milan will appreciate the beauty of the old cloisters of the Catholic University as well as the cultural programme. We hope you enjoy your time in Milan, a city not only of industry, fashion, and design but also of history and culture.

We warmly welcome you all and in particular our colleagues from Ukraine.
